

# How to Outline Fonts in InDesign

After you have made your InDesign file with your fonts, the first step is to outline the fonts. To do this you highlight the text in your document (you can do it section by section, or if your text is threaded, you can highlight the entire document). This figure shows only some of the text highlighted.

## How to Outline Fonts in InDesign (continued)

The second step is to open the drop-down window under “Type” and select “Create Outlines.” (If you have all the text highlighted it will create outlines of all the text. If you highlight text in sections, you will have to repeat this step until you have created outlines for all the text in the document.) Now you are done creating outlines of the text.
