Visit:

- Summary of Recommendations for Child/Teen Immunization
- Summary of Recommendations for Adult Immunization

For more than 20 years, IAC has been publishing its summaries of ACIP vaccine recommendations, updating them yearly more often for many recommendations, and sending them to CDC for technical review. Both the child/teen and adult summaries have been reprinted in state immunization newsletters, textbooks, and are two of the most frequently downloaded documents from IAC’s website. If you haven’t seen them or used them, please try them out!
