**4. Signs & Symptoms of Adverse Events**

Adverse events following immunization (AEFI) are a normal part of the process. However, they can cause concern. If you or someone you know has experienced an adverse event after a vaccination, it is important to follow up with your healthcare provider to discuss the situation.

**5. Explain Adverse Event Reporting**

Adverse events can range from mild to severe and may occur shortly after or days, weeks, or even months after a vaccination. Reporting adverse events is important for public health purposes and can help improve safety measures.

**6. Vaccine Information Statement**

The Vaccine Information Statement provides information about the vaccine, its benefits, potential side effects, and steps to take if an adverse event occurs.

**7. Vaccine Safety**

Vaccine safety is a priority, and every effort is made to ensure vaccines are safe and effective. Adverse events are carefully monitored and reported to the relevant authorities.
